Community Health Workers:
Pivotal to Community Health and Well-being

The Community Health Worker Core Consensus (C3) Project
The C3 Project provides the most current set of roles and competencies for community health workers (CHWs). Vetted and approved by a majority of CHW associations, networks, and alliances across the country, the C3 Project establishes national consensus on CHW core roles, skills, and qualities.

CHW is an umbrella term. There are many other names for CHWs – the names are as diverse as the communities, sites and roles in which CHWs serve. CHWs focus on improving individual and community health and health access. They forge connections where people live, learn, work, worship and heal, from the inner city to rural communities.
